Contents

Volume 28

Should there be a separate code of nomenclature for the protists?
J.O. Corliss (Albuquerque, NM) 1

The nature of the last universal ancestor and the root of the tree of life, still open questions
P. Forterre, N. Benachenhou-Lahfa, F. Confalonieri, M. Duguet, C. Elie and B. Labedan (Orsay, France) 15

Energy metabolism of ancestral eukaryotes: a hypothesis based on the biochemistry of amitochondriate parasitic protists
M. Müller (New York, NY) 33

The evolution of RNA editing in kinetoplastid protozoa
L.F. Landweber (Cambridge, MA) 41

Matrix representation in reconstructing phylogenetic relationships among the eukaryotes
M.A. Ragan (Halifax, Canada) 47

Eukaryote-eukaryote endosymbioses: insights from studies of a cryptomonad alga
S.E. Douglas (Halifax, Canada) 57

The four genomes of the alga *Pyrenomonas salina* (Cryptophyta)
U.-G. Maier (Freiburg, FRG) 69

Gene phylogenies and the endosymbiotic origin of plastids
C.W. Morden, C.F. Delwiche, M. Kuhsel and J.D. Palmer (Honolulu, HI; Madison, WI; Albany, NY; Bloomington, IN) 75

The number of symbiotic origins of organelles
T. Cavalier-Smith (Vancouver, Canada) 91

Protoctists and polyphyly: comment on 'The number of symbiotic . . . by T. Cavalier-Smith'
L. Margulis 107

When is a family not a family?
G.W. Saunders, G. Kraft, I.H. Tan and L.D. Druehl (Parkville, Australia; Burnaby, Canada) 109

Detecting morphological convergence in true fungi, using 18S rRNA gene sequence data
M.L. Berbee and J.W. Taylor (Berkeley, CA) 117

Green algae and the evolution of land plants: inferences from nuclear-encoded rRNA gene sequences
R.L. Chapman and M.A. Buchheim (Baton Rouge, LA) 127

An analysis of partial 28S ribosomal RNA sequences suggests early radiations of sponges
B. Lafay, N. Boury-Esnault, J. Vacelet and R. Christen (Villefranche sur Mer and Marseille, France) 139

Quantization test of the evolution trend of *Paleocosta pervinquieri* (Ostracode) during a 10-million year period (Djebel-Dyr section, Paleogene, Algeria)
E. Braccini, J.P. Peypouquet and R.H. Benson (Talence, France; Washington, DC) 153

Miocene variability of *Calcidiscus* gr. *leptoporus* and possible evolutionary relationship with another Coccolithaceae: *Umbilicosphaera* gr. *sibogae*
M.-C. Janin (Paris, France) 169

The impact of environment on ontogenesis variations in *Ruggieria* and *Chrysocythere* (ostracoda)
L. Bertholon and P. Carbonel (Talence, France) 179
Unusual extrusive organelles in karyorelictid ciliates: an argument for the ancient origin of this group
I.B. Raikov (St. Petersburg, Russia) 195
Flagellar apparatus duplication and partition, flagellar transformation during division in *Entosiphon sulcatum*
G. Brugerolle (Aubiere, France) 203

Subject Index 211
Author Index 213
Contents 215
